\ AMPLIFYING EVERY VOICE /

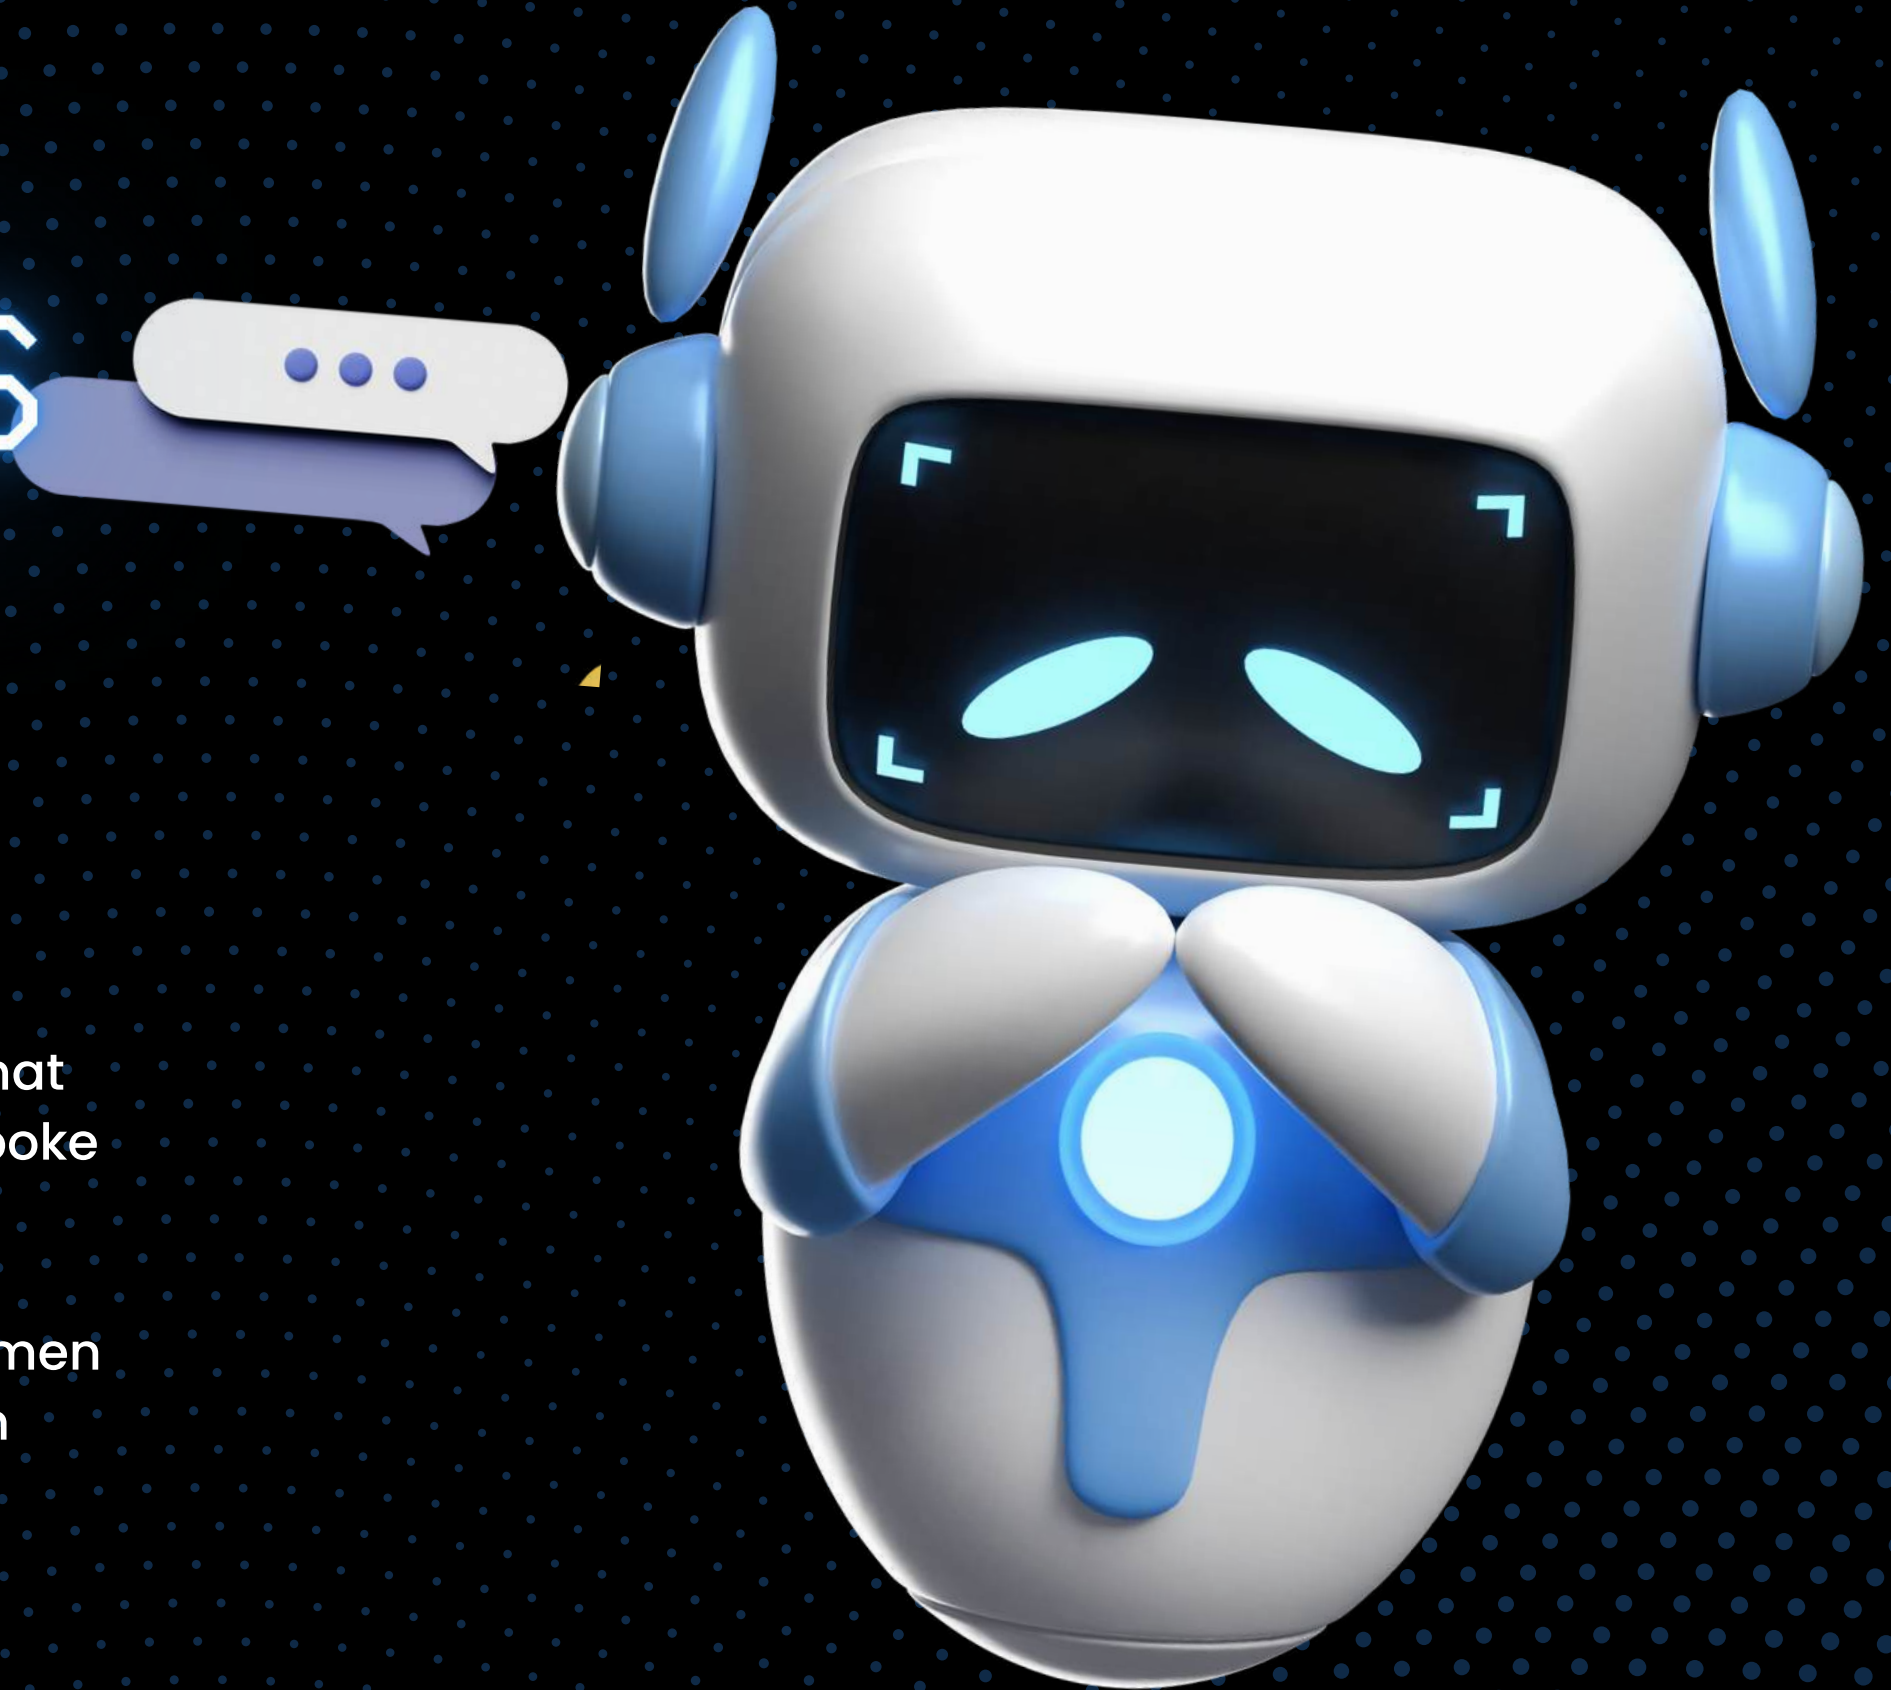

# CURRENT ISSUES

Are meeting as equal as we think?

Did you know?

A study from George Washington University found that men interrupted 33 percent more often when they spoke with women than when they spoke with other men

The 2024 report from McKinsey notes that 39% of women reported being interrupted or spoken over more than others!

## Impact

- dominant voice would skew conversation and final decision making

## Result?

- Lost ideas. Lower engagement. Hidden potential.

# OUR SOLUTION

## | ECHO-HER

AI powered voice equaliser for meeting

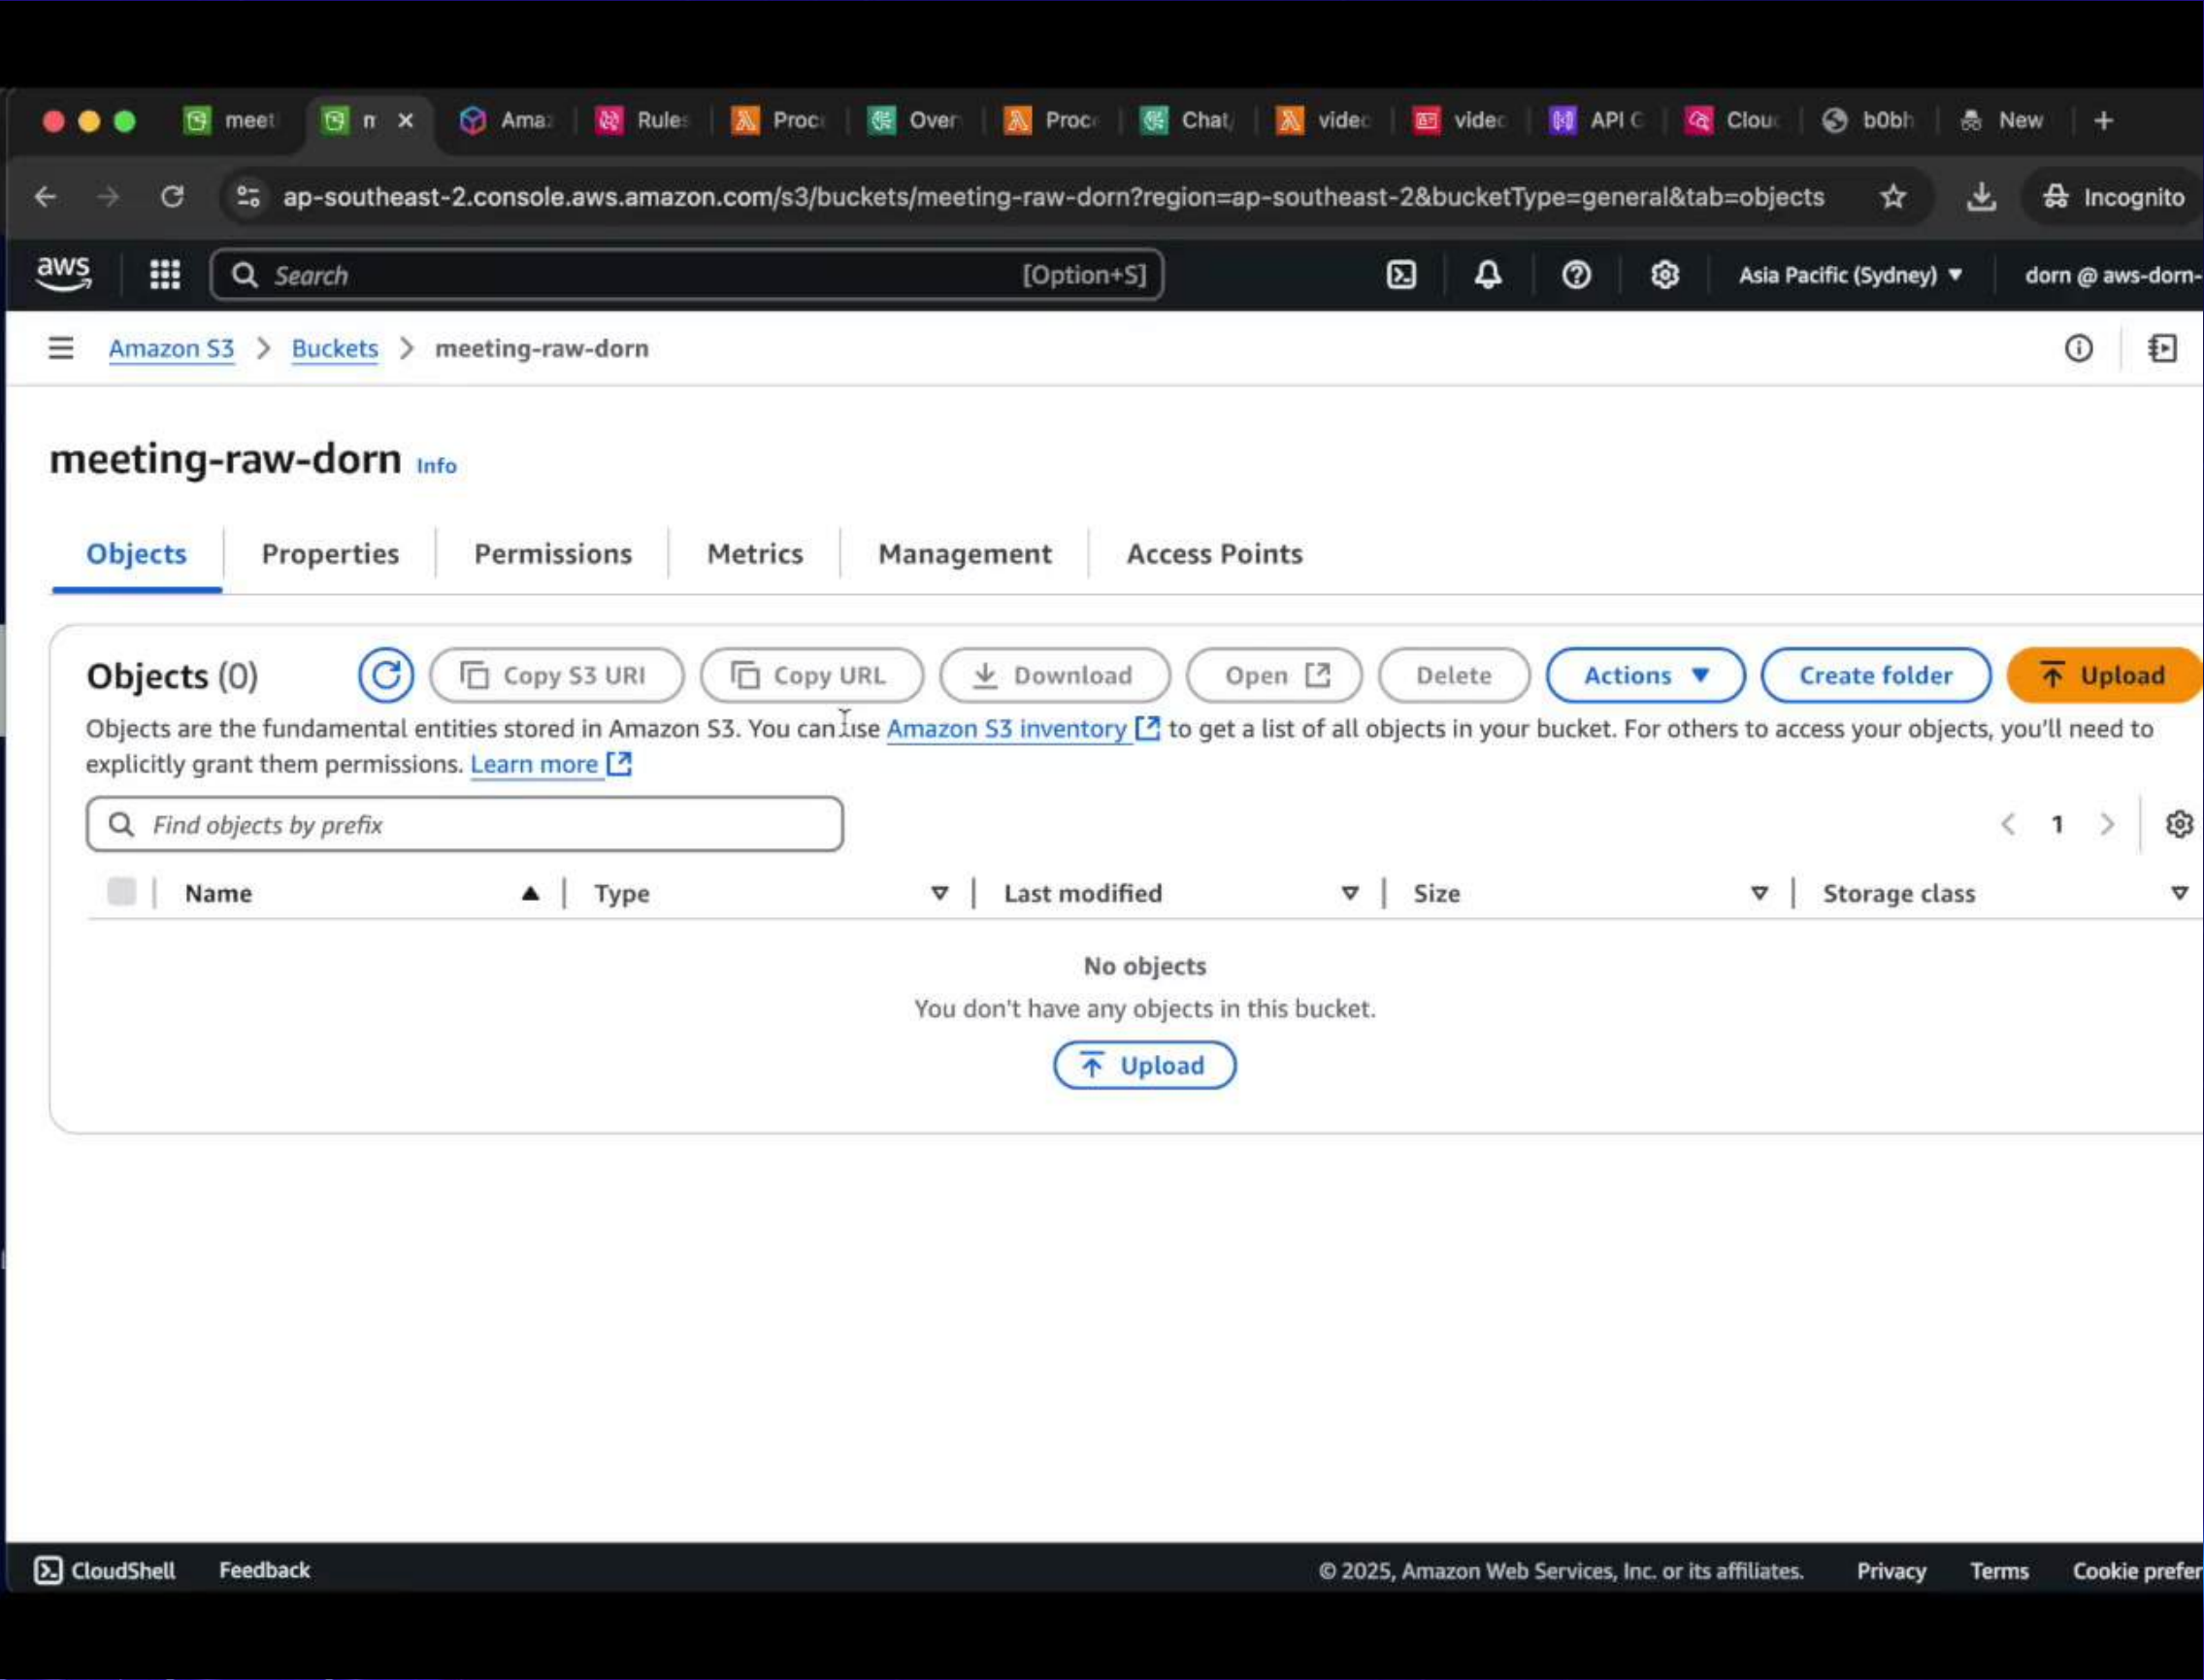

- Post Insight into workplace meeting
  - how many interruptions occur throughout the meeting
  - % of total interruptions in the meeting
- Identify who spoke? who didn't? who was heard? who wasn't?
- Rates the speaker's effectiveness based on clarity, confidence, engagement, and delivery.
- Provides the speaker with recommendations on how to improve their performance, directed them to useful resources specific to individuals

{  
"spk\_1": {  
"Clarity": "The speaker's tone and language are clear and concise, effectively conveying the technical details of the workflow they have developed. The speaker uses appropriate technical terminology and provides a structured overview of the steps involved.",  
"Confidence": "The speaker appears confident in their knowledge and delivery, providing a clear and organized presentation of the information.",  
"Engagement": "The speaker maintains a good level of engagement with the audience, using questions and visual aids to ensure the audience is following along and understanding the content.",  
"Delivery": "The speaker's delivery is smooth and well-paced, with appropriate pauses and emphasis to highlight key points. The overall delivery is professional and effective."  
},  
"spk\_0": {  
"Clarity": "The speaker's tone and language are generally clear, though there are a few instances where the language is a bit more casual or informal. The speaker effectively communicates their questions and concerns about the technical aspects of the workflow.",  
"Confidence": "The speaker appears confident in their understanding of the topic and in their ability to engage with the other speaker.",  
"Engagement": "The speaker is actively engaged in the discussion, asking relevant questions and providing feedback to the other speaker.",  
"Delivery": "The speaker's delivery is natural and conversational, with appropriate pauses and tone changes to convey their thoughts and reactions. The overall delivery is effective in the context of the discussion."

A 3D rendered robot character with a white body and blue accents. It has a large, black rectangular screen for a face, which displays two large, glowing cyan circles as eyes. The robot has two blue antennae-like protrusions on its head. It is holding a yellow pencil with a red eraser and a sharpened lead tip in its right hand. The robot is positioned against a dark blue background with a pattern of small, lighter blue dots.
